

1 A Deterministic Layout-Aware Scientific Paper Parsing System

Left column page 1. The first column must be read before the second column. A deterministic transfor-
mation rejoins a Latin word inside one positioned block. The well-known method keeps ordinary compound hyphens intact.

1 Introduction

The layout model uses coordinates and font sizes without calling an external service. Similar Article Notes remain body content.

Right column page 1. This sentence follows every sentence in the left column. Search and question answering consume the corrected reading order. Formula $x-y$ and Chinese text ??-?? remain unchanged.

2 Results

The parser records page-local character ranges and stable block identifiers for later highlighting.

Figure 1. A full-width caption follows both columns and records the deterministic final reading order for review.

2 A Deterministic Layout-Aware Scientific Paper Parsing System

Left column page 2. The first column must be read before the second column. A deterministic transfor-
mation rejoins a Latin word inside one positioned block. The well-known method keeps ordinary compound hyphens intact.

1 Introduction

The layout model uses coordinates and font sizes without calling an external service. Similar Article Notes remain body content.

Right column page 2. This sentence follows every sentence in the left column. Search and question answering consume the corrected reading order. Formula $x-y$ and Chinese text ??-?? remain unchanged.

2 Results

The parser records page-local character ranges and stable block identifiers for later highlighting.

Figure 2. A full-width caption follows both columns and records the deterministic final reading order for review.

3 A Deterministic Layout-Aware Scientific Paper Parsing System

Left column page 3. The first column must be read before the second column. A deterministic transfor-
mation rejoins a Latin word inside one positioned block. The well-known method keeps ordinary compound hyphens intact.

1 Introduction

The layout model uses coordinates and font sizes without calling an external service. Similar Article Notes remain body content.

Right column page 3. This sentence follows every sentence in the left column. Search and question answering consume the corrected reading order. Formula $x-y$ and Chinese text ??-?? remain unchanged.

2 Results

The parser records page-local character ranges and stable block identifiers for later highlighting.

Figure 3. A full-width caption follows both columns and records the deterministic final reading order for review.
